- Managing time effectively to ensure the website are finished within the timeline
- Delivering an excellent UX/UI

Soft Skills

Leadership

When I was a Chief Radio Producer. At the end of my period, the producer department had managed to achieving all of the key performance index. What I did as a chief was simple, I did more often communication with my team to build a great relationship through brainstorming, ideation, and do some fun activities together, because I tried to make everyone comfortable in the team. I believe that bonding process has lead us to perform admirably, and become one of the best organisation in campus.

Teamwork

Facing unpredictable issue such as Covid-19, would be experienced by most people. Shifting from in person group work to fully online, doesn't make me and the team underperform. It shows by we got one of the best team in 2 different subjects on my third semester, and I got full mark on peer assesment which indicate group member's contribution

Organisation

Chief Radio Producer (2016)

E-FM Campus Radio

- Leading the department and make planning
